

M247 DR & BC

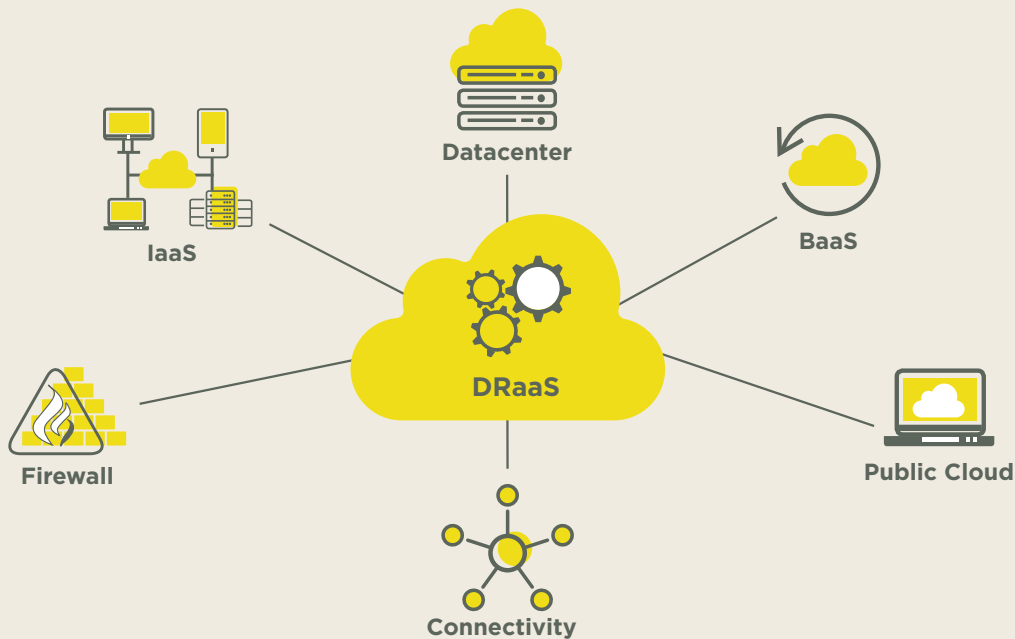

M247 Disaster Recovery & Business Continuity (DR & BC) at a glance

In addition to cyber-attacks that have become more and more frequent, other problems for companies are natural disasters (earthquakes, fires, floods, etc.) and IT equipment failures (computers, servers, routers, switches, etc.).

These unwanted events cause the interruption of production and/or the loss of important information for the respective company.

With over 20 years of experience in data centers, a state of art global network and a team of experts, M247 is the perfect choice as a technological partner for protecting and securing your business data.

M247 DR & BC technology and service infrastructure

Hardware

- Based on Dell technology, high capacity, redundant, scalable storage equipment
- Hosted in M247 Tier 3 data centers, located in Bucharest, Romania

Software

- Powered by Veeam and Zerto replication platforms

Scalability

- Scalable solution based on customer needs, up to 192 TB single data pool

Support

- Global support 24/7/365

M247 DR & BC offers:

Data protection for natural disasters

Easily data recovery anytime

Geographical separation of company's data

Specialized support from M247 experts

Data back-up cannot be encrypted, modified and deleted as results of cyber-attacks

Cost reduction by using a solution "as a service" instead of building a secondary site with ready-to-go storage, networking and access
