

M247 Backup as a Service (BUaaS) at a glance

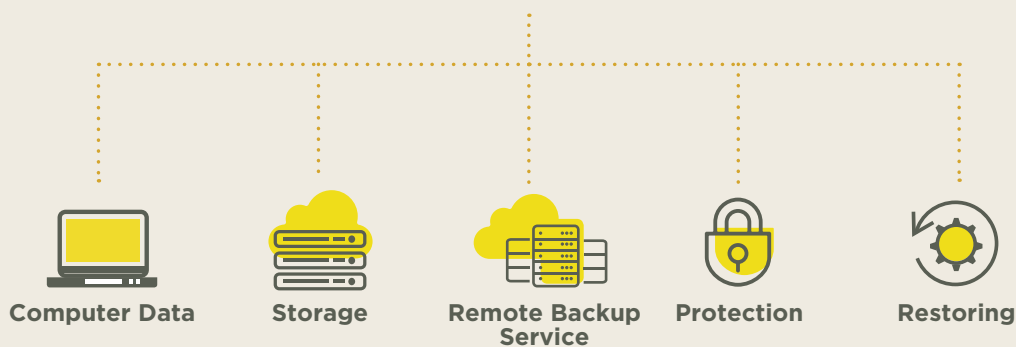

Cyber-attacks are becoming more frequent and more sophisticated, generating huge losses for companies regardless of their size. A ransomware attack can rapidly reduce company's productivity, freeze operational processes and loose critical information. The loss of a company's customer data is priceless and can even lead to its bankruptcy

M247 BUaaS offers a complete solution for critical data backup and a protection against cyber-attacks.

Based on a flexible and scalable platform, M247 BUaaS counteracts the negative effects of ransomware attacks, offering a fast backup based on policies, with reduced times for company data transfer and restore.

M247 BUaaS technology and service infrastructure

BACKUP

Hardware

- Based on Dell technology, high capacity, redundant, scalable storage equipment
- Hosted in M247 Tier 3 data centers, located in Bucharest, Romania

Software
