

M247Cloud at a glance

Harnessing the very best in hardware and software partnerships, our M247Cloud platform is raising the bar for business cloud solutions. We offer international networking up to 10 Gbps, all-flash / NVME acceleration and industry-leading security.

M247 technology and service infrastructure

Hardware built on

- Hyperconverged infrastructure
- Cisco, Juniper and Fortinet network
- Intel Xeon Gold CPU Series

Virtualisation

- Fully Software Defined (SDDC)
- Powered by Microsoft Azure Pack or VMware and Veeam

Data Center

- 2 Tier 3 data centers located in Bucharest, Romania
- We have presence and connectivity in some of the world's most important DC locations with our extended network of over 50 data centers in 37 cities, across 26 countries

Support

- 24/7/365 global support

M247Cloud includes:

Compute

- High performance, low density
- 1/10 Gbps international networking capabilities
- Fully resilient and highly available architecture

Storage

- SSD/NVME accelerated
- Low latency
- High IOPS
- Distributed (HCI) storage
- Fast scaling
- Optimized for virtual and cloud native workloads

Network

- Cisco, Juniper and Fortinet Service Provider grade network
- 25/100Gbps networking
- Low latency
- International reach
- Integrate virtual data center with physical co-located kit (from any of our DC's)

Data Protection

- Intrusion Prevention & Intrusion Detection
- Policy driven protection
- Comprehensive application protection
- DRBC Data Management
- Industry leading Recovery Point Objective (RPO)/Recovery time Objective (RTO) (under 10 seconds)
- Fully automated and orchestrated workload failover/failback

Virtualisation. Hypervisor options

- Microsoft Windows Azure Pack (Hyper-V)
- VMware and VMware Cloud Director
