# M247
Anti-DDoS

M247 Anti-DDoS at a glance

Organizations around the world depend on Internet now more than ever to conduct business and deliver services. This Internet becomes more complex each year due to the demand for faster connections, 5G, Internet of Things (IoT) and cloud services. Distributed Denial of Service (DDoS) threats have grown in sophistication, size, and frequency, impacting the security and availability of the Internet. Downtime and Internet disruption can damage brand reputation, customer trust and revenue.

M247 Anti-DDoS technology and infrastructure services

DataPath Deployment

Central Management
